1. Scope and legal framework

This Privacy Notice applies to Personal Data processed through e-citizen Nigeria, including e-citizen.ng, related mobile applications, dashboards, APIs, support channels, consent workflows, reports and communications operated by Biosec Solutions Limited (“Biosec”, “we”, “us” or “our”).

We process Personal Data in accordance with the Nigeria Data Protection Act 2023 (“NDPA”), applicable directives and guidance issued by the Nigeria Data Protection Commission (“NDPC”), including the General Application and Implementation Directive 2025 where applicable, and other relevant Nigerian laws such as the Federal Competition and Consumer Protection Act 2018 and the Credit Reporting Act 2017.

Additional privacy information may be shown for a particular Service or Source Institution. Where a service-specific notice gives more detailed information, it should be read together with this Notice.

The Services currently offered are National Identification Number (NIN) verification, phone-number verification, financial credit verification, business verification and vehicle identification number (VIN) verification. Biosec will update this Notice before introducing another verification category.

2. Who we are and our data-protection roles

Biosec Solutions Limited (RC 901419) operates e-citizen and is generally the Data Controller for Account administration, Platform security, payments, customer support, service analytics, marketing and the processing activities for which Biosec determines the purposes and means.

A Source Institution remains responsible for the official or source record it maintains. Depending on the agreement and the Service, Biosec may act as an independent controller, a joint controller or a processor acting on the Source Institution’s documented instructions. Where this materially affects your rights or contact point, we will provide additional information in the relevant Service notice.

Our Data Protection Officer may be contacted at info@biosec.com.ng or at our Abuja office listed in section 22.

3. Who this Notice applies to

- **Platform Users.** Individuals who register, pay, submit a request, receive a result, contact support or otherwise use e-citizen.
- **Verification Subjects.** Individuals whose NIN, phone, financial credit, business-related or VIN information is requested, authenticated or returned through a Service.
- **Business contacts and authorised users.** Employees, officers, agents and representatives of organisations that use or integrate with the Platform.
- **Website and app visitors.** People whose device and usage information is processed when they visit or interact with our digital services.
- **Complainants and rights requesters.** People who contact us about privacy, security, correction, access, complaints or disputes.

4. Personal Data we process

Category	Examples	Who it usually relates to
Account and contact data	Name, email address, telephone number, username, account status, organisation and role.	Platform Users; business contacts
Authentication data	Password hash, one-time-password status, authentication token, login provider identifier and security challenge information.	Platform Users; Verification Subjects where authentication is required

Category	Examples	Who it usually relates to
Search and identity data	Name, National Identification Number (NIN), phone number, business identifier, vehicle identification number (VIN), date of birth or other search criteria required for the selected Service.	Verification Subjects
Verification Results	Match/no-match status, identity attributes, phone information, financial credit information, business information, VIN-related information and response metadata returned by a Source Institution.	Verification Subjects; businesses where the information is not Personal Data
Consent and authority records	Consent decision, date and time, channel, registered contact response, declared purpose, requester details and evidence of authority.	Platform Users and Verification Subjects
Payment and billing data	Amount, currency, payment reference, gateway, transaction status, receipt, refund and reconciliation information.	Paying Platform Users
Technical and usage data	IP address, device, browser, operating system, session, timestamps, pages or features used, app diagnostics, cookies and similar identifiers.	Users and visitors
Security and fraud data	Risk signals, failed login records, suspicious-query indicators, access logs, investigation records and blocked identifiers.	Users, visitors and Verification Subjects where relevant
Support and communications	Emails, calls, chat messages, attachments, complaint details and customer-service history.	People who contact us
Rights and compliance records	Identity evidence supplied for a rights request, request details, response, legal hold, regulatory and audit records.	Data Subjects, complainants and authorised representatives
Marketing preferences	Subscription status, communication preferences, campaign response and opt-out record.	Users and business contacts

We do not intentionally collect more Personal Data than is reasonably necessary for the selected Service. The exact fields depend on the Service, Source Institution and applicable law.

5. Where Personal Data comes from

- directly from a Platform User during registration, payment, support or submission of a Verification Request;
- directly from a Verification Subject through consent, authentication, correction or a rights request;
- from government agencies, statutory bodies, licensed credit bureaus, telecommunications data providers, vehicle-information providers, corporate registries and other authorised Source Institutions;
- from contracted verification and data-access providers, including Smile ID, Premby IdentityPass and Mono, which may query a Source Institution directly or through an authorised upstream partner;
- from social-login and identity providers where a User chooses that login method;
- from payment gateways, banks and mobile-payment providers;
- automatically from devices, applications, cookies, logs, security tools and analytics systems; and

- from an employer, client, agent, professional adviser, authorised representative, regulator, court or law-enforcement body where lawful.

Where Personal Data is obtained from another person or Source Institution, we will provide required privacy information through this Notice, a consent prompt, the Service interface or another appropriate channel, subject to lawful exceptions.

6. Why we process Personal Data and our lawful bases

Purpose	Typical data	Lawful basis	Key safeguards
Create and manage Accounts	Account, contact and authentication data	Contract; legitimate interests in operating secure accounts	Identity checks, access controls, separate authorised-user access where available
Provide a requested verification	Search criteria, consent/authority records, source response and result	Consent where required; contract where the Data Subject is the User; legitimate interests subject to balancing; legal obligation or another lawful basis where applicable	Purpose declaration, data minimisation, source restrictions, audit trail, limited result access
Obtain or record consent	Contact, authentication, consent decision and timestamp	Consent; legal obligation; legitimate interests in demonstrating lawful processing	Clear affirmative action, withdrawal mechanism, consent evidence
Provide credit-information Services	Identity and credit information, permissible-purpose and consent records	Consent and other basis permitted by applicable credit-reporting law	Licensed source, need-to-know controls, limited retention and access
Process payments and refunds	Payment reference, amount, status and contact data	Contract; legal obligation; legitimate interests in reconciliation and fraud prevention	PCI-compliant payment providers where applicable; limited card-data handling
Customer support and complaints	Contact, transaction, correspondence and attachments	Contract; legitimate interests; legal obligation	Need-to-know support access, identity verification for sensitive requests
Security, fraud prevention and abuse detection	Technical, usage, authentication and risk data	Legitimate interests; legal obligation; establishment or defence of legal claims	Monitoring, access controls, investigation thresholds, retention limits
Compliance, audit and legal claims	Transactions, consent evidence, rights requests, investigations and disclosures	Legal obligation; legitimate interests; establishment, exercise or defence of legal claims	Restricted access, legal review, documented disclosures
Improve Platform reliability and user experience	Usage, diagnostics and aggregated service data	Legitimate interests; consent for non-essential cookies where required	Aggregation, de-identification, cookie controls, no incompatible re-use
Send service communications	Account, transaction and contact data	Contract; legal obligation; legitimate interests	Operational messages only; communication preferences where applicable
Marketing	Contact details, preferences and campaign interaction	Consent or legitimate interests where permitted	Clear opt-out, suppression list, no sale of Personal Data

Where we rely on legitimate interests, we consider the purpose, necessity, reasonable expectations and impact on the Data Subject. We do not rely on legitimate interests where the Data Subject's rights and interests override the proposed processing.

7. Sensitive and higher-risk information

Some Services may involve government identifiers, biometric attributes returned by a Source Institution, financial or credit information, or other information that requires enhanced protection. We process such information only where an applicable lawful basis, contractual permission and technical access control are in place.

- We do not use biometric or credit information for advertising.
- We do not build a general-purpose database of Verification Results for sale.
- Credit reports are made available only through authorised sources and subject to applicable consent and permissible-purpose requirements.
- Where proposed processing is likely to create a high risk to individuals, we carry out or support a Data Protection Impact Assessment as required.
- Access is limited according to role, purpose and service configuration.

8. Consent

Where we rely on consent, the request will identify the purpose and require a clear affirmative action. Consent must be freely given, specific, informed and unambiguous. Silence or inactivity is not consent.

A Data Subject may refuse or withdraw consent at any time through the relevant Service flow or by contacting info@e-citizen.ng. Withdrawal does not affect processing already lawfully completed. Where the Service cannot lawfully continue without consent, withdrawal or refusal may prevent completion or further access to the result.

We retain appropriate evidence of consent and withdrawal for accountability, security and dispute resolution. Consent for one purpose does not automatically authorise a different purpose.

9. Automated decision-making and user decisions

e-citizen is designed to retrieve and present verification information. Biosec does not ordinarily make a solely automated decision that produces legal or similarly significant effects for a Verification Subject. A Source Institution may use automated matching to return a status, and the Platform may use automated security rules to flag or block suspicious activity.

A User or Business User that makes an employment, credit, tenancy, insurance, onboarding or other significant decision using a Verification Result is responsible for the decision and for any applicable notice, fairness, human review, correction and appeal requirements.

10. Who we share Personal Data with

We disclose Personal Data only where necessary for the stated purpose, where required by law or where another lawful basis applies. Recipients may include:

- **The requesting User or authorised Business User.** A Verification Result is disclosed to the person or organisation that lawfully requested it.
- **The Verification Subject.** Consent, access, correction and rights information may be sent directly to the person concerned.
- **Source Institutions.** Search criteria, purpose, requester details, consent status or technical information may be transmitted as required to perform the request.
- **Service providers.** Hosting, cloud, communications, identity, customer-support, analytics, cybersecurity and professional service providers processing information under contract and confidentiality obligations.
- **Payment providers.** Gateways, banks, card networks and mobile-payment providers involved in payment, reconciliation, refund and fraud prevention.
- **Group companies and transaction successors.** Where necessary for shared services, restructuring, investment, merger or sale, subject to applicable safeguards and notice.
- **Regulators, courts and law enforcement.** Where disclosure is required by law, court order, regulatory request, legal process, or necessary to protect rights, safety or the integrity of the Platform.
- **Professional advisers.** Lawyers, auditors, insurers and consultants who require the information for legitimate professional purposes.

We do not sell or rent Personal Data. We do not permit a service provider to use Personal Data for its own unrelated marketing.

11. International transfers

Some service providers, cloud systems, support personnel or technical infrastructure may be located outside Nigeria or may permit access from another country. Before transferring Personal Data from Nigeria, we document an applicable transfer basis and assess the protection available in the destination and through the recipient's legal, contractual, technical and organisational safeguards.

Depending on the transfer, safeguards may include an adequacy basis recognised under the NDPA, contractual clauses, binding corporate rules, approved codes or certifications, the Data Subject's informed consent where appropriate, or another exception permitted by law. Additional information about a material transfer and its safeguard may be requested from info@e-citizen.ng, subject to confidentiality and security restrictions.

12. Retention and deletion

We retain Personal Data only for as long as reasonably necessary for the purpose, applicable law, Source Institution requirements, security, audit, complaint handling and legal claims. Different categories have different periods.

Category	Typical retention	Notes
NIMC-sourced verification data	Up to 24 hours while awaiting the Verification Subject's consent and up to a further 24 hours after consent is granted.	After the access period, the retrieved result is deleted from the active verification cache, subject to lawful audit metadata and source requirements.
Vehicle verification data	Up to 7 days.	A shorter period may apply where required by the Source Institution or service configuration.
Credit bureau data	Up to 7 days.	Subject to the licensed credit bureau's terms and applicable credit-reporting law.
Other Verification Results	For the result-access period stated for the Service, then deleted, returned to the Source Institution or de-identified.	The Service interface may show the exact availability window.
Search, consent and audit metadata	For the period reasonably required to demonstrate authority and consent, investigate misuse, resolve disputes and comply with law.	May include transaction reference, status, timestamps and access records without retaining the full result.
Account data	For the life of the Account and thereafter for the period required for closure, security, disputes and legal obligations.	Data not needed after closure is deleted or de-identified.
Payment and accounting records	For the applicable statutory accounting, tax, fraud-prevention and dispute period.	We generally retain transaction references rather than full card details.
Security logs	For a risk-based period appropriate to detecting and investigating abuse or compromise.	Longer retention may apply to a live investigation or legal hold.
Support, complaints and rights requests	For the period needed to resolve the matter and demonstrate compliance.	Identity evidence is limited and protected.
Marketing data	Until opt-out, withdrawal or loss of relevance, with a minimal suppression record retained to respect the opt-out.	Operational service messages are not marketing.

Deletion from active systems may not immediately remove data from encrypted backups. Backup data is isolated, protected and overwritten according to the backup cycle, unless it must be restored for continuity or retained under a legal hold.

13. Security

We use technical and organisational measures designed to protect the confidentiality, integrity and availability of Personal Data. Measures are selected according to the amount and sensitivity of data, processing context, likely harm, available technology and cost.

- encryption in transit and at rest where appropriate to the system and data;
- role-based access, authentication, logging and periodic access review;
- segregation of duties and restricted access to sensitive results;
- secure software development, vulnerability management and monitoring;
- backup, recovery, incident response and business-continuity procedures;
- vendor due diligence, contracts and confidentiality obligations;
- staff privacy and security training; and
- periodic risk assessment, audit and testing.

No electronic system is completely secure. Users must also protect passwords, devices, downloaded results and organisational access. Please report suspected compromise to info@e-citizen.ng promptly.

14. Personal Data breaches

We maintain procedures to identify, contain, investigate and document a Personal Data breach. Where a breach is likely to result in a risk to the rights and freedoms of Data Subjects, we will notify the NDPC within the period required by the NDPA, generally within 72 hours after becoming aware, where feasible. Where the risk is high, we will also communicate with affected Data Subjects as required by law.

A notification may describe the nature of the breach, likely consequences, measures taken or proposed, and a contact point. We may delay or limit public details where necessary to avoid compromising security, an investigation or the rights of other persons.

15. Your rights

Subject to applicable conditions and lawful exceptions, a Data Subject may have the right to:

- be informed about the processing of their Personal Data;
- obtain confirmation whether we process their Personal Data and access a copy and related information;
- request correction of inaccurate or incomplete Personal Data;
- request deletion where the data is no longer necessary, consent has been withdrawn and no other lawful basis applies, or the processing is unlawful;
- request restriction of processing in appropriate circumstances;
- object to processing based on legitimate interests and object to direct marketing at any time;
- withdraw consent without affecting prior lawful processing;
- receive qualifying Personal Data in a structured, commonly used and machine-readable format and request transmission where technically feasible;
- not be subject to a solely automated decision producing legal or similarly significant effects, subject to lawful exceptions;
- complain to the NDPC; and
- seek compensation or another legal remedy where available.

A request to correct an underlying official, credit, vehicle, business or telecommunications record may need to be made to the relevant Source Institution. We will correct information controlled by Biosec and provide reasonable guidance for source-record disputes.

16. How to exercise your rights

Send a request to info@e-citizen.ng and state the right you wish to exercise, the relevant Account or transaction details, and enough information for us to locate the data. You may use an authorised representative, but we may request proof of authority.

- We will verify identity proportionately to the sensitivity of the data and the risk of unauthorised disclosure.
- We aim to respond to a valid and complete request within 30 days, subject to any extension or exception permitted by applicable law.
- We ordinarily do not charge a fee. A reasonable fee or refusal may apply where a request is manifestly unfounded or excessive, where permitted by law.
- If we refuse or limit a request, we will explain the reason and available complaint route, unless the law prevents us from doing so.
- We maintain a record of requests and responses for accountability.

17. Children and persons lacking legal capacity

The Platform is not intended for Account holders under 18. A parent, legal guardian or other authorised adult should create and use the Account where a Service lawfully concerns a child or person who lacks legal capacity.

Where consent is the lawful basis for processing a child's Personal Data, we obtain or require verifiable consent from the parent or legal guardian, unless an exception under applicable law applies. We use age and authority checks proportionate to the risk and available technology.

18. Cookies, analytics and similar technologies

Our websites and applications may use cookies, software development kits, local storage, pixels and similar technologies. These may be:

- **Strictly necessary.** Required for login, security, payment flow, session management and core functionality.
- **Preference.** Used to remember language, display and user choices.
- **Analytics.** Used to understand performance, errors and use of the Platform.
- **Advertising or campaign measurement.** Used to measure campaigns or tailor advertising where enabled and lawfully consented to.

Where required, non-essential technologies are used only after consent through the cookie control. A user can change choices through the Platform or browser settings, although disabling necessary technologies may prevent some functions. Additional details may be provided in a Cookie Notice or cookie settings panel.

19. Marketing communications

We may send information about e-citizen or related Biosec services where you have consented or where another lawful basis permits. Marketing messages will identify the sender and provide an opt-out method. You may unsubscribe at any time without affecting operational messages, receipts, security notices or responses to your request.

We maintain a limited suppression record after opt-out so that we do not re-add the address inadvertently. We do not use Verification Results or credit information for behavioural advertising.

20. Third-party websites and services

The Platform may link to or integrate with Source Institutions, social-login providers, payment providers and other third parties. An independent third party's processing is governed by its own privacy notice. We encourage you to review it. This Notice does not cover a third party's separate website or processing that Biosec does not control.

21. Changes to this Notice

We may update this Notice to reflect changes in law, regulatory guidance, Source Institution arrangements, technology or our processing. The latest version and effective date will be published on the Platform. Where

a change is material, we will provide a prominent notice or direct communication where reasonably practicable.

22. Contact and complaints

Data Controller	Biosec Solutions Limited (RC 901419)
Platform	e-citizen Nigeria
DPO / privacy requests	info@biosec.com.ng
Customer support	info@e-citizen.ng
Security incidents	info@e-citizen.ng
Abuja office	8B Rumbek Close, off Sudan Street, Wuse Zone 6, Abuja, Nigeria
Website	www.e-citizen.ng / www.biosec.com.ng

Please contact our DPO first so that we can investigate and respond. You also have the right to lodge a complaint with the Nigeria Data Protection Commission:

Regulator	Nigeria Data Protection Commission (NDPC)
Address	No. 12 Dr Clement Isong Street, Abuja, Nigeria
Email	info@ndpc.gov.ng
Website	www.ndpc.gov.ng

The NDPC's contact information may change. Please confirm the current complaint channel on its official website before submitting a complaint.

23. Key definitions

Term	Meaning
Consent	A freely given, specific, informed and unambiguous indication of a Data Subject's wishes through a statement or clear affirmative action.
Data Controller	A person or organisation that, alone or jointly, determines the purposes and means of processing Personal Data.
Data Processor	A person or organisation that processes Personal Data on behalf of a Data Controller.
Data Subject	The identified or identifiable natural person to whom Personal Data relates.
Personal Data	Information relating to an identified or identifiable natural person.
Processing	Any operation performed on Personal Data, including collection, use, transmission, storage, access, alteration, disclosure and deletion.
Source Institution	A government agency, licensed bureau, commercial data provider or other authorised source from which information is requested or received.
Verification Result	The response, report, status, match, no-match, consent outcome or other information generated or returned for a Verification Request.

Publication notice

This is the public e-citizen Nigeria Privacy Notice, Version 2.1, effective 4 August 2026. It replaces Privacy Policy Version 1.1 for use after the effective date.
