1. About these Terms

These Terms of Service (the “Terms”) govern access to and use of e-citizen Nigeria, including e-citizen.ng, any Nigeria-specific e-citizen website, mobile application, application programming interface, dashboard, report, communication or related service made available by Biosec Solutions Limited (“Biosec”, “we”, “us” or “our”).

By creating an account, clicking an acceptance box, paying for a Service, submitting a Verification Request, accessing a Verification Result or otherwise using the Platform, you agree to these Terms and the e-citizen Nigeria Privacy Notice. If you use the Platform on behalf of an organisation, you confirm that you have authority to bind that organisation.

If a separately signed agreement applies to an enterprise, API, government or institutional service, that agreement will prevail to the extent of any direct conflict with these Terms. These Terms continue to apply to matters not addressed in the separate agreement.

2. About e-citizen

e-citizen is a private information and identity verification platform operated by Biosec. The Services currently offered are National Identification Number (NIN) verification, phone-number verification, financial credit verification, business verification and vehicle identification number (VIN) verification. Biosec will update the Platform and applicable legal notices before introducing another verification category.

The Platform may transmit a request to, and return information from, a government agency, statutory body, licensed credit bureau, corporate registry, telecommunications data provider, vehicle-information provider, approved technology partner or another authoritative source (each a “Source Institution”).

Biosec does not ordinarily connect directly to every underlying government or statutory database. Verification Requests may be routed through contracted verification and data-access providers, including Smile ID, Prembly IdentityPass and Mono, depending on the Service and availability. A provider may access a Source Institution directly or through an authorised upstream partner. Biosec requires provider assurances concerning lawful source access, onward disclosure, security, retention, incident notification and permitted use.

- Biosec does not create or control the underlying official record held by a Source Institution.
- A Verification Result is normally a snapshot of information returned at the time of the request and may later change.
- A Verification Result is not an official certificate unless the relevant Service expressly describes it as one.
- A reference to a Source Institution, logo or database does not by itself mean that the Source Institution endorses e-citizen.
- The range, content and availability of Services may vary by user, location, device, lawful basis, source availability and regulatory requirements.

3. Definitions

Term	Meaning
Account	A registered profile used to access the Platform.
Business User	A company, partnership, public body, professional practice, sole proprietor or other organisation using the Services for business or institutional purposes.
Consumer	An individual using a Service primarily for personal purposes.
Data Subject / Verification Subject	The natural person whose Personal Data is requested, checked or returned through a Service.

Term	Meaning
Personal Data	Information relating to an identified or identifiable natural person.
Platform	The e-citizen Nigeria websites, applications, APIs, dashboards and related systems operated by Biosec.
Service	A verification, search, report, account feature or related function offered through the Platform.
Source Institution	A government agency, licensed bureau, commercial data provider or other authorised source from which information is requested or received.
Verification Request	A request submitted through the Platform using search criteria supplied by a user.
Verification Result	The response, report, status, match, no-match, consent outcome or other information generated or returned in response to a Verification Request.
User / you	The person or organisation accessing or using the Platform.

4. Eligibility and acceptance

You must be at least 18 years old and legally capable of entering into a binding agreement to create an Account or purchase a Service. A parent, guardian or other authorised adult may use their own Account where a Service lawfully concerns a child or person who lacks legal capacity.

You consent to receive agreements, receipts, notices, consent prompts, security alerts and other communications electronically. Electronic records and communications satisfy any requirement that they be in writing, subject to applicable law.

You may not use the Platform if you have been suspended or prohibited from doing so, or where your use would be unlawful.

5. Your account and security

You must provide complete and accurate registration information and keep it up to date. You must not create an Account using another person's identity or contact details without lawful authority.

- Keep your password, one-time password and authentication device confidential.
- Do not share an individual Account. A Business User should create separate authorised-user access where that feature is available.
- Use multi-factor authentication and other security controls where offered.
- Notify us promptly at info@biosec.com.ng or info@e-citizen.ng if you suspect unauthorised access, disclosure or use.
- Review Verification Requests and payment activity regularly and report disputed activity promptly.

You are responsible for activity performed through your Account to the extent that the activity results from your acts, omissions, credential-sharing or failure to use reasonable security. You will not be responsible for activity caused solely by a security failure within systems controlled by Biosec. We may temporarily lock an Account while investigating suspected fraud, compromise or unlawful use.

6. How the Services work

1. You select a Service and provide the requested search criteria and declared purpose.

2. The Platform may validate the request, request payment and, where applicable, seek the Verification Subject's consent or authentication.
3. The request is transmitted to the relevant Source Institution or authorised provider.
4. The Platform returns the available result, status or error response and makes it accessible for the stated access period.
5. The request, consent and access may be logged for security, compliance, audit, dispute resolution and service administration.

A Service may require additional terms, a consent statement or a service notice. Those service-specific terms form part of these Terms. You should review the description, price, required information, completion criteria and refund rule shown before paying.

7. Lawful purpose, authority and user assurances

For every Verification Request, you confirm and warrant that:

- **Lawful purpose.** You have a specific, lawful and legitimate reason for the request.
- **Authority.** You are entitled to submit the search criteria and obtain the Verification Result, including any consent or permission required by law, the Source Institution or the relevant service notice.
- **Accuracy.** The search criteria and declarations you submit are complete and accurate to the best of your knowledge.
- **Limited use.** You will use the Verification Result only for the declared purpose and will not disclose it to an unauthorised person.
- **Evidence.** You will retain appropriate evidence of purpose, authority and consent, and will provide it to Biosec where reasonably required for compliance or investigation.
- **Fair decisions.** You will not use a Verification Result unlawfully or as the sole basis for a decision that significantly affects a person where applicable law requires notice, further assessment, human review or an opportunity to challenge the information.

Biosec may ask for supporting documents, suspend a request or Account, restrict access, preserve relevant records or report conduct to a Source Institution, regulator or law-enforcement body where we reasonably suspect misuse or are legally required to do so.

8. Acceptable use

You must not, directly or through another person:

- submit a request without a lawful purpose or required authority;
- circumvent, falsify, manipulate or interfere with a consent, authentication, payment, access-control or security process;
- impersonate a Verification Subject, use stolen identifiers or misrepresent your relationship with a person or organisation;
- scrape, crawl, bulk-query, robotically access, reverse engineer, probe, overload or disrupt the Platform, except under a written API or testing agreement;
- copy, republish, sell, sublicense, aggregate or build a database from Verification Results unless expressly authorised in writing;
- use information for fraud, stalking, harassment, intimidation, discrimination, unlawful surveillance or any criminal purpose;
- alter a Verification Result or present it in a misleading manner;
- upload malicious code or attempt to gain access to another user's Account, result or data;
- remove ownership, security, consent, timestamp or audit information from a result; or
- use the Platform in breach of the Nigeria Data Protection Act 2023, the Credit Reporting Act 2017, the Federal Competition and Consumer Protection Act 2018 or any other applicable law.

9. Consent and Verification Subjects

Some Services require the Verification Subject to approve the request through a registered telephone number, email address, one-time password, authentication service or another consent method. Other Services may rely on another lawful basis where consent is not legally required.

- Consent must be freely given, specific, informed and indicated by a clear affirmative action.
- Silence, inactivity, a pre-ticked box or deception does not constitute consent.
- A Verification Subject may refuse or withdraw consent, but withdrawal does not invalidate processing lawfully completed before withdrawal.
- Biosec may be unable to complete a consent-based Service where the Verification Subject cannot access the contact information held by the Source Institution, does not respond or refuses consent.
- For credit-information Services, any consent and permissible-purpose requirements imposed by applicable credit-reporting law and the relevant licensed credit bureau must be satisfied.

10. Verification Results and source information

Biosec aims to transmit requests accurately and return the response received from the relevant Source Institution. However, the underlying information is supplied and maintained by the Source Institution, not created by Biosec.

- A match does not guarantee that the person presenting information is physically the same person identified in the source record unless the Service includes an appropriate authentication step.
- A no-match result may arise from incorrect search criteria, incomplete source data, a recent update, source limitations or the absence of a record.
- A result may be delayed, incomplete or unavailable because of source downtime, connectivity, maintenance, regulatory restrictions or events outside Biosec's reasonable control.
- Verification Results should be considered together with the context, the purpose of the request and any other reasonable checks required by law or good practice.

If you believe Biosec displayed or transmitted a result incorrectly, contact support with the transaction reference. We will review the transmission and, where appropriate, correct or re-run it. If the dispute concerns the accuracy of the underlying record, you may need to contact the Source Institution. We will provide reasonable guidance and, where permitted, supporting transaction information.

11. Prices, payments and taxes

The price and currency of a Service will be displayed before payment. You must pay the displayed amount using an approved payment method. We may use third-party gateways, banks, card networks or mobile-payment providers. Their separate terms and privacy notices may apply.

- You authorise the selected payment provider to process the payment information you submit.
- Biosec generally receives a payment reference and status rather than full card details.
- You must not use an unauthorised, stolen or fraudulent payment method.
- Applicable taxes, levies or gateway charges will be displayed where required.
- A payment confirmation does not by itself mean that a Verification Request has been successfully completed.
- Promotional prices, discounts and credits may be subject to additional conditions and expiry dates disclosed at the time of issue.

12. Refunds, reversals and service credits

The fee normally covers the electronic submission and processing of a Verification Request, not a guarantee that the underlying record exists or that a Verification Subject will consent. The applicable completion and refund rule should be displayed before you pay.

Situation	Default treatment
Payment taken but the request was not transmitted	Refund, reversal or equivalent service credit after reconciliation.
Duplicate debit for the same transaction	Refund or reversal of the duplicate amount after confirmation.
Material technical failure attributable to Biosec and no usable result	Re-performance, service credit or refund, as reasonably appropriate.
Source Institution unavailable and the request cannot be completed after reasonable retries	Re-performance, service credit or refund, subject to the service notice.
Incorrect or incomplete search criteria supplied by the user	Normally non-refundable once transmitted.
No matching record is returned after a valid source query	Normally non-refundable where the service notice states that a completed search includes a no-match result.
Verification Subject refuses, does not respond or cannot receive a consent request	The refund or charge rule displayed for that consent-based Service will apply.
Result was available but the user failed to access or download it within the stated period	Normally non-refundable.
User changes their mind after the request has been transmitted	Normally non-refundable, without affecting any mandatory consumer cancellation right.

To request assistance, contact info@e-citizen.ng with the transaction reference, amount, date and evidence of debit. Approved refunds are returned through the original payment method where practicable. Gateway and bank processing times are outside Biosec's direct control. Nothing in this section limits a remedy that cannot lawfully be excluded under the Federal Competition and Consumer Protection Act 2018 or another applicable law.

13. Business and organisational use

A Business User is responsible for its authorised users, internal purpose controls, access permissions, staff training, retention and disclosure of Verification Results. It must ensure that each request has a documented lawful purpose and that results are used only by personnel who need them.

Unless otherwise agreed in writing, Business Users must not offer the Services to third parties, operate as a reseller, embed the Services in another product, perform bulk verification or access the Platform through automated means. API, reseller and high-volume access require a separate written agreement.

Where a Business User uses a Verification Result in a decision affecting a person, it is responsible for the decision, the applicable notice, fairness, human review, correction and appeal obligations. Biosec supplies information; it does not make the Business User's decision.

14. Third-party services and social login

The Platform may use or link to third-party services, including Google, Facebook or Apple sign-in, payment gateways, communications providers, analytics services and Source Institution systems. Your use of a third-party service is governed by its own terms and privacy notice.

Biosec is responsible for selecting and managing service providers under its control in accordance with applicable law, but is not responsible for an independent third party's separate website, service, record, security or decision. A link or integration does not constitute endorsement unless we expressly say so.

15. Privacy and data protection

Our processing of Personal Data is described in the e-citizen Nigeria Privacy Notice. The Privacy Notice explains what we collect, where it comes from, why we process it, who receives it, how long it is kept and how Data Subjects may exercise their rights.

You must not submit another person's Personal Data to the Platform unless you have a lawful basis and have provided any notice required by law. You must protect Verification Results against unauthorised access, disclosure, loss and misuse.

16. Intellectual property and licence

The Platform, software, workflows, user interface, databases compiled by Biosec, documentation, designs, graphics, logos, trademarks and other Biosec materials are owned by or licensed to Biosec and are protected by applicable intellectual-property law. Source records remain subject to the rights of the relevant Source Institution or data owner.

Subject to these Terms, Biosec grants you a limited, non-exclusive, non-transferable, non-sublicensable and revocable licence to access and use the Platform for your own lawful purposes. No other right is granted.

You may download or print a Verification Result only for the purpose for which it was lawfully obtained. You may not remove notices, alter the result, misrepresent its source, reproduce the Platform or use our trademarks without written permission.

To report alleged copyright or trademark infringement, contact info@e-citizen.ng with sufficient details for us to assess the claim.

17. Service changes and availability

We may add, remove, suspend or modify a Service because of legal requirements, a Source Institution's decision, security concerns, maintenance, technical limitations or commercial changes. Where practicable, we will give reasonable notice of a material change that adversely affects an existing paid Service.

We do not guarantee continuous or error-free availability. Planned maintenance may be announced, while emergency maintenance or source outages may occur without advance notice. We will use reasonable efforts to restore affected Services and apply the refund rules in section 12 where appropriate.

18. Suspension, termination and account closure

You may stop using the Platform and request Account closure at any time. Closure does not cancel a completed transaction, remove records we must retain by law or affect accrued rights and obligations.

We may restrict, suspend or terminate access where reasonably necessary to:

- protect the Platform, a Source Institution, a Verification Subject or another user;
- investigate suspected fraud, compromise, unlawful searches or breach of these Terms;
- comply with law, a court order, a regulator or a Source Institution instruction;
- address non-payment or a disputed payment; or
- discontinue the Platform or relevant Service.

Where appropriate and legally permitted, we will give notice and an opportunity to explain or remedy the issue. Immediate action may be taken where delay could create harm, security risk or legal exposure. You may appeal a suspension by contacting info@e-citizen.ng.

19. Disclaimers

The Platform is provided on an "as available" basis. To the fullest extent permitted by law, Biosec does not warrant that every Source Institution record is accurate, complete, current or available; that every request will produce a match; or that the Platform will be uninterrupted or free from all security threats.

Biosec does warrant that it will use reasonable care and skill in operating the Platform, transmitting requests and displaying responses. Nothing in these Terms excludes any implied term, statutory guarantee or consumer right that cannot lawfully be excluded.

Verification Results are informational tools and are not legal, financial, employment, immigration, insurance or professional advice. You remain responsible for the purpose, interpretation and decision made using a result.

20. Liability

Nothing in these Terms limits or excludes liability for fraud, fraudulent misrepresentation, wilful misconduct, gross negligence where it cannot lawfully be limited, death or personal injury caused by negligence, or any liability or remedy that applicable law does not permit us to exclude or limit.

Subject to the preceding paragraph:

- Biosec is not liable for loss caused by incorrect information supplied by you, unauthorised use of your Account, your unlawful use or disclosure of a result, or an error in the underlying record maintained by a Source Institution;
- Biosec is not liable for an independent third party's system failure, act or omission, except to the extent that Biosec failed to use reasonable care in selecting or managing a provider under its control;
- for a Business User, Biosec is not liable for indirect, incidental, special or consequential loss, loss of profit, revenue, opportunity, goodwill or anticipated savings, except where such exclusion is prohibited by law; and
- for any claim directly arising from a specific paid Verification Request, Biosec's aggregate liability will not exceed the amount paid for that request, unless applicable law requires a greater remedy.

The exclusions and limitations in this section are intended to be conspicuous and should be read together with sections 10, 12 and 19. They do not prevent a Consumer from seeking a statutory refund, re-performance, compensation or other remedy where legally available.

21. Responsibility for unlawful use

You are responsible for losses, claims, regulatory action and reasonable costs caused by your unlawful Verification Request, deliberate misuse, unauthorised disclosure, false representation or material breach of sections 7 to 9.

A Business User will, to the extent permitted by law, indemnify Biosec and its personnel against a third-party claim arising directly from the Business User's unlawful purpose, lack of authority, misuse of a Verification Result or breach of applicable data-protection obligations. This does not apply to loss caused by Biosec's own breach, negligence or unlawful conduct.

22. Complaints and disputes

Please first contact info@e-citizen.ng and provide the transaction reference and a clear description of the issue. We will acknowledge and investigate the complaint and aim to provide a substantive response within a reasonable period.

- Privacy complaints and Data Subject rights requests may be sent to info@e-citizen.ng.
- Consumers may also use the complaint channels of the Federal Competition and Consumer Protection Commission where applicable.
- Data Subjects may complain to the Nigeria Data Protection Commission where they believe their Personal Data has been processed unlawfully.
- A dispute concerning an underlying government, credit, vehicle, business or telecommunications record may need to be directed to the relevant Source Institution.

These Terms are governed by the laws of the Federal Republic of Nigeria. If a dispute is not resolved through the complaint process or good-faith negotiation, it may be brought before a court of competent jurisdiction in Nigeria. Nothing prevents either party from seeking urgent protective relief or using a mandatory regulatory or consumer-redress process.

23. Changes to these Terms

We may amend these Terms to reflect changes in law, regulation, Source Institution requirements, technology, security or the Services. The updated version and effective date will be published on the Platform.

Where a change materially affects your rights or an existing paid Service, we will provide a prominent notice or direct communication where reasonably practicable. Your continued use after the effective date constitutes acceptance. If you do not agree, you should stop using the Platform and close your Account.

24. General provisions

- **Entire agreement.** These Terms, the Privacy Notice, relevant service notices and any applicable separate written agreement form the agreement concerning the Platform.
- **Severability.** If a provision is unlawful or unenforceable, it will be adjusted or removed only to the minimum extent necessary, without affecting the remainder.
- **No waiver.** A delay in enforcing a right does not waive it.
- **Assignment.** You may not transfer your Account or rights without our consent. Biosec may transfer these Terms as part of a restructuring, group transfer, sale or lawful outsourcing, subject to applicable data-protection and consumer law.
- **Third-party rights.** Except where expressly stated, these Terms do not give enforcement rights to a person who is not a party.
- **Language.** The English version governs the Nigeria Service. A translation may be provided for convenience.
- **Survival.** Sections relating to lawful use, privacy, intellectual property, liability, records, disputes and accrued obligations survive termination where necessary.
